* Excludes Carports and Garages

An approved water tap inspection starts the billing. Applicant will receive a bill UNTIL WE RECEIVE A COPY OF CUSTOMER SERVICE INSPECTION CERTIFICATE FROM BUILDER OR PLUMBER, we can then transfer to next owner.

I, the Applicant agree to comply with the following:

All plumbing inspections will be performed by the District's approved plumbing inspector: Able Restoration Services @ (512) 633-2167

(It is the Builder's responsibility to call before starting construction. Please contact us for the inspector's current contact information.)

The owner's cut-off valve & meter box with lid shall be in place at the time of meter installation for complete inspection. I will notify Crossroads Utility Services in writing 24 hours in advance to request the final inspection and install my meter by faxing in my request to (512) 246-1900.

EXHIBIT 1

SERVICE AGREEMENT

- I. **PURPOSE.** Paloma Lake Municipal Utility District No. 1 (the "*District*") is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The District enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before the District will begin service. In addition, when service to an existing connection has been suspended or terminated, the District will not re-establish service unless it has a signed copy of this agreement.
- II. **PLUMBING RESTRICTIONS.** The following unacceptable plumbing practices are prohibited:
- A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination must be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
 - B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply must be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
 - C. No connection which allows water to be returned to the public drinking water supply is permitted.
 - D. No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of plumbing at any connection which provides water for human use.
 - E. No solder or flux which contains more than 0.2 percent lead can be used for the installation or repair of plumbing at any connection which provides water for human use.
- III. **SERVICE AGREEMENT.** The following are the terms of the service agreement between the District and _____ ("*Customer*").
- A. The District will maintain a copy of this agreement as long as Customer and/or the premises is connected to the District's water system.

- B. Customer agrees to allow his/her property to be inspected for possible cross-connections and other unacceptable plumbing practices. These inspections will be conducted by the District or its designated agent prior to initiating new water service; when there is reason to believe that cross-connections or other unacceptable plumbing practices exist; or after any major changes to the private plumbing facilities. The inspections will be conducted during the District's normal business hours.
- C. The District will notify Customer in writing of any cross-connection or other unacceptable plumbing practice which has been identified during the initial inspection or the periodic reinspection.
- D. Customer must immediately correct any unacceptable plumbing practice on his/her premises.
- E. Customer will, at his/her expense, properly install, test, and maintain any backflow prevention device required by the District. Copies of all testing and maintenance records will be provided to the District.
- F. Customer understands and agrees that the District does not guarantee any specific quantity or pressure of water for any purpose whatsoever and that the District is not liable to customer for failure or refusal to furnish any particular amount or pressure of water to Customer at any time.

IV. ENFORCEMENT. If Customer fails to comply with the terms of the Service Agreement, the District may, at its option, either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Service Agreement will be billed to Customer.
